8) For marketing to be effective, it must _____.

- A) create a buying experience
- B) help people connect with the people in their lives
- C) create customer value
- D) develop a culture of warmth and belonging
- E) deliver high quality products

Answer: C

Diff: 3

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Analytical thinking

9) Marketers today find great success just blasting out one-way messages.

Answer: FALSE

Diff: 1

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Analytical thinking

10) A good definition of marketing is "telling and selling."

Answer: FALSE

Diff: 1

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Analytical thinking

11) Marketing is primarily concerned with engaging customers and secondarily with managing profitable customer relationships.

Answer: FALSE

Diff: 2

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Analytical thinking

12) Broadly defined, marketing is a social and managerial process by which individuals and organizations obtain what they need and want through creating and exchanging value with others.

Answer: TRUE

Diff: 1

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Analytical thinking

13) The final step in the marketing process is capturing customer value in the form of profits and customer equity.

Answer: TRUE

Diff: 1

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Application of knowledge

14) What is marketing? Briefly describe the marketing process.

Answer: Marketing can be defined as the process by which companies create value for customers and build strong customer relationships in order to capture value from customers in return. The marketing process consists of five steps. In the first four steps, companies work to understand consumers, create customer value, and build strong customer relationships. In the final step, companies reap the rewards of creating superior customer value. By creating value for consumers, they in turn capture value from consumers in the form of sales, profits, and long-term customer equity.

Diff: 2

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Analytical thinking

15) Explain why marketing is not simply "making a sale."

Answer: Marketing is essentially satisfying customer needs. If marketers engage consumers effectively, understand their needs, develop products that provide superior customer value, and price, distribute, and promote them well, these products will sell easily. In fact, according to management guru Peter Drucker, "The aim of marketing is to make selling unnecessary."

Diff: 3

LO: 1-1: Define marketing and outline the steps in the marketing process.

AACSB: Analytical thinking

16) Needs are defined as _____.

- A) states of felt deprivation
- B) objects of desire shaped by culture
- C) states of perceived excess
- D) desires backed by buying power
- E) personal and individualized wants

Answer: A

Diff: 2

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

17) _____ are the form human needs take as they are shaped by culture and individual personality.

- A) Wants
- B) Necessities
- C) Services
- D) Benefits

Answer: B

Diff: 1

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

Use the information below to answer the following questions.

Amazon founder Jeff Bezos vaulted to the position of wealthiest person in the world in a relatively short period of time by building his small online book selling platform into an online retail giant. Jeff Bezos views Amazon's role as that of "creating genuine value for customers." Bezos is motivated by the fact that Amazon customers will be loyal until another firm offers better products and/or service. Amazon has also been extremely innovative in the order and delivery process which makes the shopping experience a breeze for consumers. In the past three years Amazon's revenues have almost doubled to \$575 billion dollars, an average of about \$1.1 million in sales each minute of the day.

26) Much of Amazon's success can be attributed to _____.

- A) rapid delivery
- B) selling only the highest quality products
- C) identifying customer needs
- D) creating value for customers
- E) a vast product selection

Answer: D

Diff: 3

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

27) Based on Amazon's approach, what question would the company most likely ask itself to make a decision?

- A) Which products are most desired?
- B) Which approach is most newsworthy?
- C) What's best for the customer?
- D) What is the next big thing?
- E) How much faster can we deliver?

Answer: C

Diff: 2

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

28) If Jeff Bezos and Amazon originally focused solely on his online product offerings, he would be guilty of _____.

- A) marketing myopia
- B) focusing on needs over wants
- C) paying too much attention to the customer
- D) competitive analysis
- E) niche marketing

Answer: A

Diff: 2

Answer: TRUE

Diff: 2

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

34) A greater focus on underlying customer needs than on existing customer wants leads to marketing myopia.

Answer: FALSE

Diff: 2

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Application of knowledge

35) A market is a segment of potential consumers who share a common need or want.

Answer: TRUE

Diff: 1

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

36) A market is a physical space where exchange occurs.

Answer: FALSE

Diff: 2

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

37) Using suitable examples, briefly compare and contrast the concepts of needs, wants, and demands. Discuss how these concepts relate to marketing practices.

Answer: Human needs are states of felt deprivation. Needs are part of the human make-up; they are not created by external forces. Humans have a basic physical need for food, clothing, warmth, and safety, a basic social need for belonging and affection, and a basic individual need for knowledge and self-expression. Unlike needs, wants are not innate. Instead, wants are needs shaped by culture, society, and individual personality. For example, an American needs food, wants a Big Mac and soft drink, and demands lunch at McDonald's. Wants become demands when they are backed by consumers' buying power. Marketers conduct extensive research to understand customers' needs, wants, and demands. They then attempt to fulfill customers' needs, wants, and demands through their market offerings.

Diff: 3

LO: 1-2: Explain the importance of understanding the marketplace and customers and identify the five core marketplace concepts.

AACSB: Analytical thinking

38) Explain market offerings and marketing myopia.

Answer: Consumers' needs and wants are fulfilled through market offerings—some combination of products, services, information, or experiences offered to a market to satisfy a need or a want. Market offerings are not limited to physical products. They also include services—activities or benefits offered for sale that are essentially intangible and do not result in the ownership of anything. Examples include banking, airline, hotel, retailing, and home repair services. More broadly, market offerings also include other entities, such as persons, places, organizations, information, and ideas. Many sellers make the mistake of paying more attention to the specific products they offer than to the benefits and experiences produced by these products. These sellers suffer from marketing myopia. They are so taken with their products that they focus only on existing wants and lose sight of underlying customer needs. They forget that a product is only a tool to solve a consumer problem. A manufacturer of quarter-inch drill bits may think that the customer needs a drill bit but what the customer really needs is a quarter-inch hole. These sellers will have trouble if a new product comes along that serves the customer's need better or less expensively. The customer will have the same need but will want the new product.

Answer: FALSE

Diff: 1

LO: 1-3: Identify the key elements of a customer value-driven marketing strategy and discuss the marketing management orientations that guide marketing strategy.

AACSB: Analytical thinking

68) Why do companies generally divide a market into segments of customers?

Answer: A company decides whom it will serve by dividing the market into segments of customers and selecting which segments it will go after. Some people think of marketing management as finding as many customers as possible and increasing demand. But marketing managers know that they cannot serve all customers in every way. By trying to serve all customers, they may not serve any customer well. Hence, companies usually want to select only customers that they can serve well and profitably. Ultimately, marketing managers must decide which customers they want to target and on the level, timing, and nature of their demand.

Diff: 2

LO: 1-3: Identify the key elements of a customer value-driven marketing strategy and discuss the marketing management orientations that guide marketing strategy.

AACSB: Application of knowledge

69) Compare and contrast the product and production concepts.

Answer: The production concept holds that consumers will favor products that are available and highly affordable. Therefore, it dictates that management should focus on improving production and distribution efficiency. This concept is one of the oldest orientations that guides sellers. The production concept is still a useful philosophy in some situations. For example, both personal computer maker Lenovo and home appliance maker Haier dominate the highly competitive, price-sensitive Chinese market through low labor costs, high production efficiency, and mass distribution. However, although useful in some situations, the production concept can lead to marketing myopia. Companies adopting this orientation run a major risk of focusing too narrowly on their own operations and losing sight of the real objective—satisfying customer needs and building customer relationships. The product concept holds that consumers will favor products that offer the most in quality, performance, and innovative features. Under this concept, marketing strategy focuses on making continuous product improvements. Product quality and improvement are important parts of most marketing strategies. However, focusing only on products can also lead to marketing myopia. For example, manufacturers of mousetraps might believe that if they can build a better mousetrap, their profits will soar, but they are often rudely shocked. Buyers may be looking for a better solution to a mouse problem but not necessarily for a better mousetrap. The better solution might be a chemical spray, an exterminating service, a house cat, or something else that suits their needs even better than a mousetrap. Furthermore, a better mousetrap will not sell unless the manufacturer designs, packages, and prices it attractively, places it in convenient distribution channels, brings it to the attention of people who need it, and convinces buyers that it is a better product.

Diff: 3

LO: 1-3: Identify the key elements of a customer value-driven marketing strategy and discuss the marketing management orientations that guide marketing strategy.

AACSB: Analytical thinking

70) Compare the selling and marketing concepts, and list the key components of each concept.

Answer: The selling concept reflects an inside-out perspective, while the marketing concept takes an outside-in perspective. The selling concept is typically practiced when an organization markets products or services that buyers do not normally think of purchasing, such as insurance or blood donation. Aggressive selling focuses on creating sales transaction rather than on building long-term relationships with customers, with the aim of selling what a company makes rather than making what the customer wants. The marketing concept, on the other hand, is based on identifying the needs and wants of target markets and then satisfying those needs and wants better than competitors do. Under the marketing concept, customer focus and value are the paths to sales and profits. Instead of a product-centered make-and-sell philosophy, the marketing concept is a customer-centered sense-and-respond philosophy. The job is not to find the right customers for a product but to find the right products for customers.

71) Briefly explain the societal marketing concept.

Answer: The societal marketing concept questions whether the pure marketing concept overlooks possible conflicts between consumer short-run wants and consumer long-run welfare. Is a firm that satisfies the immediate needs and wants of target markets always doing what's best for its consumers in the long run? The societal marketing concept holds that marketing strategy should deliver value to customers in a way that maintains or improves both the consumer's and society's well-being. It calls for sustainable marketing, socially and environmentally responsible marketing that meets the present needs of consumers and businesses while also preserving or enhancing the ability of future generations to meet their needs. Companies like GE, Dow, Google, IBM, and Nestle are concerned not just with short-term economic gains, but with the well-being of their customers, the depletion of natural resources vital to their businesses, the viability of key suppliers, and the economic well-being of the communities in which they produce and sell.

Diff: 2

LO: 1-4: Discuss customer relationship management and identify strategies for creating value for customers and capturing value from customers in return.

AACSB: Analytical thinking

103) Define customer-perceived value.

Answer: Customer-perceived value is defined as the customer's evaluation of the difference between all the benefits and all the costs of a market offering relative to those of competing offers. Importantly, customers often do not judge values and costs accurately or objectively. They act on perceived value. A customer buys from the firm that offers the highest customer-perceived value.

LO: 1-4: Discuss customer relationship management and identify strategies for creating value for customers and capturing value from customers in return.

AACSB: Analytical thinking

104) The aim of customer relationship management is to create not just customer satisfaction, but customer delight as well. Explain.

Answer: Customer satisfaction cannot be taken for granted. Since brand loyalty is dependent upon strong customer satisfaction, companies strive to retain, satisfy, and even delight current customers. Firms create customer delight by promising only what they can deliver and then delivering more than what they promise. They also create emotional relationships with key customers. Delighted customers make repeated purchases and become customers for life. More importantly, they also essentially become an unpaid sales force for the firm as "customer evangelists" who tell other potential customers about their positive experiences with a product.

LO: 1-4: Discuss customer relationship management and identify strategies for creating value for customers and capturing value from customers in return.

AACSB: Analytical thinking

105) Discuss the idea that greater customer empowerment means that companies must shift from marketing by intrusion to marketing by attraction.

Answer: Companies create market offerings and messages that engage customers rather than interrupt them. Hence, marketers now combine their mass-media marketing with a rich mix of online, mobile, and social media marketing that promotes brand-customer engagement, brand conversations, and brand advocacy among customers. "Rather than have their brand content peppered around something that people want to engage with, only to have people be annoyed by the brand for interrupting that engagement," says an analyst, "marketers want their brands to be producing the thing that people want to engage with now." For example, companies post their latest ads and videos on social media sites, hoping they'll go viral. They use a host of digital channels to start conversations with and between customers, address customer issues, research customer reactions, and drive traffic to relevant articles, web and mobile marketing sites, videos, and other brand content. They launch blogs, mobile apps, brand microsites, and consumer review systems to engage customers on a more personal, interactive level. Skilled use of digital media can get customers involved with a brand, talking about it, and advocating it to others.

LO: 1-4: Discuss customer relationship management and identify strategies for creating value for customers and capturing value from customers in return.

AACSB: Analytical thinking

106) Compare and contrast customer-managed relationships and consumer-generated marketing.
Answer: Today's consumers have more information about brands than ever before, and they have a wealth of platforms for airing and sharing their brand views with other consumers. Thus, the marketing world is now embracing not only customer relationship management, but also customer-managed relationships. Greater consumer control means that companies can no longer rely on marketing by intrusion. Instead, marketers must practice marketing by attraction—creating market offerings and messages that involve consumers rather than interrupt them. Hence, most marketers now augment their mass-media marketing efforts with a rich mix of direct marketing approaches that promote brand-consumer interaction. For example, many brands are creating dialogues with consumers via their own or existing online social networks. A growing part of the new customer dialogue is consumer-generated marketing, by which consumers themselves are playing a bigger role in shaping their own brand experiences and those of others. This might happen through uninvited consumer-to-consumer exchanges in blogs, video-sharing sites, and other digital forums. Increasingly, companies are also inviting consumers to play a more active role in shaping products and brand messages. One drawback of this process is that harnessing consumer-generated content can be time-consuming and expensive.

LO: 1-4: Discuss customer relationship management and identify strategies for creating value for customers and capturing value from customers in return.

AACSB: Analytical thinking

107) Define customer equity, and explain why it is important to a company.

Answer: Customer equity is the sum of the lifetime values of all the current and potential customers of a company. Customer equity is dependent upon customer loyalty from a firm's profitable customers. Because customer equity is a reflection of a company's future, companies must manage it carefully, viewing customers as assets that need to be maximized. It is important that companies not only acquire customers but also keep and grow them. When companies create profitable customers, they earn a greater share of their purchases, and capture their customer lifetime value.

LO: 1-4: Discuss customer relationship management and identify strategies for creating value for customers and capturing value from customers in return.

AACSB: Analytical thinking

108) Discuss potential challenges with customer-generated content.

Answer: Despite its potential for success, harnessing customer-generated content can be time-consuming and costly, and companies may find it difficult to mine even a little gold from all the content submitted. Moreover, customer participation and cocreation can backfire. For example, Australian airline Qantas's social media team once asked customers to share their #QantasLuxury "dream luxury inflight experience." It seemed like a good idea, but it was launched just one day after the airline had grounded its fleet and locked out staff for 48 hours over a union pay dispute. Needless to say, staff and customers went into full bashtag mode on X (formerly Twitter).

AACSB: Analytical thinking

109) Describe and compare the four types of customers classified by their potential profitability to an organization. Identify how an organization should manage each type of customer.

Answer: The four types of customers are strangers, butterflies, true friends, and barnacles.

1. "Strangers" have low potential profitability and loyalty. A company's offerings do not fit well with a stranger's wants and demands. Companies should not invest in building a relationship with this type of customers.

2. Another type of customer in which a company should not invest is the "barnacle." Barnacles are highly loyal but not very profitable because there is a limited fit between their needs and the company's offerings. The company might be able to improve barnacles' profitability by selling them more, raising their fees, or reducing service to them. However, if they cannot be made profitable, they should be "fired."

3. Like strangers, "butterflies" are not loyal. However, they are potentially profitable because there is a good fit between the company's offerings and their needs. Like real butterflies, this type of customer will come and go without becoming a permanent, loyal consumer of a company's products. Companies should create satisfying and profitable transactions with them, and then cease investing in them until the next time around.

4. The final type of customers is "true friends." They are both profitable and loyal. There is a strong fit between their needs and the company's offerings, so the company should make continuous relationship investments in an effort to go beyond satisfying and to delight these customers. A company should try to delight true friends so that they will tell others about their good experiences with the company.

123) List and discuss the most important step in the marketing process.

Answer: The most important step in the marketing process involves engaging target customers and building value-laden, profitable relationships with them. Throughout the process, marketers practice customer relationship management to create customer satisfaction and delight. They engage customers in the process of creating brand conversations, experiences, and community. In creating customer value and relationships, however, the company cannot go it alone. It must work closely with marketing partners both inside the company and throughout its marketing system. Thus, beyond practicing good customer relationship management and customer-engagement marketing, firms must also practice good partner relationship management.

Diff: 2

LO: 1-5: Describe the major trends and forces that are changing the marketing landscape in this age of relationships.

AACSB: Application of knowledge

124) How are marketers responding to consumers' expectations for marketing to be socially and environmentally responsible?

Answer: Marketers are reexamining their social responsibilities and their relationship with the very earth that sustains us. Some companies resist these pressures, budging only when forced by legislation or organized consumer outcries. But most companies now view sustainable marketing as an opportunity to do well by doing good. They seek ways to profit by serving immediate needs and the best long-run interests of their customers and communities. Some companies, such as Patagonia, Warby Parker, Ben & Jerry's, and others, practice caring capitalism, setting themselves apart by being civic minded and responsible. They build social and environmental responsibility into their company value and mission statements.

LO: 1-5: Describe the major trends and forces that are changing the marketing landscape in this age of relationships.

AACSB: Written and oral communication

126) Explain how the Internet has transformed the way in which we do business today.

Answer: The Internet links individuals and businesses of all types to each other. The Internet allows firms access to exciting new market spaces. The consumer love affair with digital and mobile technology makes it fertile ground for marketers trying to engage customers. Digital and social media marketing involves using digital marketing tools such as websites, social media, mobile ads and apps, online video, e-mail, blogs, and other digital platforms that engage consumers anywhere, anytime via their computers, smartphones, tablets, Internet-ready TVs, and other digital devices. At the most basic level, marketers set up company and brand websites that provide information and promote the company's products. Many of these sites also serve as online brand communities, where customers can congregate and exchange brand-related interests and information. The social media provide exciting opportunities to extend customer engagement and get people talking about a brand. Most U.S. companies now use social media as part of their marketing mixes. Mobile marketing is perhaps the fastest-growing digital marketing platform. Smartphones are ever-present, always on, finely targeted, and highly personal. This makes them ideal for engaging customers anytime, anywhere as they move through the buying process. For example, Starbucks customers can use their mobile devices for everything from finding the nearest Starbucks and learning about new products to placing and paying for orders.
